Supplemental Box Relating to Sequence Listing

Continuation of Box No. 1, item 2:

1. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this report was established on the basis that of:
 - a. type of material
 - ☒ a sequence listing

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1, 3-5	YES
	Claims	2, 6	NO
Inventive step (IS)	Claims	1, 3, 5	YES
	Claims	2, 4, 6	NO
Industrial applicability (IA)	Claims	1-6	YES
	Claims		NO

2. Citations and explanations

Document 1: W. B. Parker et al., "Metabolism of 4'-thio- β -D-arabinofuranosylcytosine", Biochemical Pharmacology, 2000, Vol. 60, pp. 1925-1932

Document 2: WO 00/04866 A2 (Southern Research Institute), 3 February 2000

Document 3: US 2002/0019363 A1 (Biochem Pharma Inc.), 14 February 2002

Claims 2 and 6

The inventions set forth in claims 2 and 6 are not novel and do not involve an inventive step in the light of documents 1 and 2, cited in the international search report.

Document 1 discloses the possibility of performing a DNA chain extension reaction by using the action of a DNA polymerase, with the incorporation of T-dCyd triphosphate.

Document 2 discloses T-dCyd triphosphate.

It should be noted that in the written reply dated 18 June 2004, the applicant asserts that documents 1 and 2 do not disclose 4'-thio-2'-deoxycytidine triphosphate (T-dCTP), on the grounds that these documents do not in fact describe the isolation and identification of T-dCTP.

However, given that document 1, especially on page 1927, discloses specific data relating to the accumulation of

PCT/JP 03/10576

the triphosphate due to metabolism of T-dCyd by CEM cells, and document 2, in Table II, also discloses similar specific data, the view that T-dCTP is not disclosed in these documents because it is not isolated and identified is not correct.

Claim 4

The invention set forth in claim 4 does not involve an inventive step in the light of documents 1-3, cited in the international search report.

Document 3 discloses a process for producing triphosphates via a series of steps involving reaction with salicylic phosphorochloride, reaction with pyrophosphoric acid, iodine oxidation, hydrolysis and removal of the protecting group, and a person skilled in the art could easily apply this production process when preparing a triphosphate disclosed in documents 1 and 2.

Claims 1, 3 and 5

The inventions set forth in claims 1, 3 and 5 are not disclosed in any of the documents cited in the international search report, and are thus novel and involve an inventive step.

Specifically, none of documents 1-3, considered to be the most relevant of the prior art documents, discloses a compound represented by formula (I) presented in claim 1.
